International Arbitration and Litigation

CEG has provided expert consulting and testimony on some of the world's largest international arbitrations to date

CEG is an economic and financial consulting firm with offices in Europe, North America and Asia-Pacific. CEG applies economic and financial analysis to assess both the question of liability as well as estimating the quantum of damages incurred. CEG's damages experience includes commercial, IP and competition damages. CEG experts have analysed damages in more than 20 countries.

With offices around the world, CEG works seamlessly – providing around the clock turn around for faster results when necessary.

CEG has world-class capabilities across a broad spectrum of industries. We have performed engagements in computer hardware and software, construction, energy, entertainment, health care, internet, pharma, publishing, transportation, and many other industries.

In contrast to many of our competitors, CEG operates at a very low leverage rate – our experts are involved directly throughout each stage of the analysis. This reduces the tendency to pursue unfruitful analyses during the preliminary analysis and execution stages, thereby avoiding increased costs to the client.

We believe our business model produces a superior work product and results in the expert being better prepared in general and in particular better equipped for cross examination and witness conferencing.

Commercial Disputes

CEG has been involved in some of the largest commercial damages cases in recent years.

CEG has successfully applied its economic and financial analytical skills in numerous cases – to assess both the question of liability as well as estimating the quantum of damages incurred.

Our team has the necessary expertise relating to the estimation of all types of damages including: business valuation; cost of capital; economics; finance; financial and cost accounting; marketing; management; and econometric and statistical modelling.
